Eco Centre
Here you will find a fully immersive and curated experience, with didactic and interactive installations telling you all about the oasis, and educational games explaining its creation. This place of knowledge is eco-friendly and it embodies a combination of tradition and innovative technology that helps to blend its organic form into the landscape.

Oasis Garden
The gardens embody three-tiered agriculture, characterised by ground crops, orchards and Palm groves. This system was vital for the self-sufficiency of the community and for the creation of the ecological microclimate of the oasis. Come and discover the features of these plants!

Techno Palm
The Techno Palm is the distinctive symbol of Oasiscape. Although it is made of modern materials, none of the features it provides can compare with the ones provided by a real Palm Tree. The Techno Palm helps you find your way around the Oasiscape.

Al Shari’a
An important component of the Al Falaj system, it is an open cistern where members of the community took water for themselves and their animals. Al Shari’a played a significant local role as a place for dialogue, recreation, bathing and washing clothes. Come and enjoy the serenity and beauty of this charming place.

Miniature Oasis
The Miniature Oasis represents an interactive experience that mimics the real oasis in the Palm grove. Here you can discover the amazing falaj network that carries water to the Palm groves. In Al Ain Oasis Plaza you will find food and beverage outlets as well as shops selling products and produce derived from the oasis. You can also enjoy the rest areas and the Nagfa Ridge Viewpoint, where the scenery may be admired.

West Gate Exhibition
This exhibit provides an intimate and sensational experience. Journey inside the falajscape, the watercourse that flowed from the main source down to the Palm groves, and discover the falaj, the ingenious irrigation system.

Al Ain Oasis film
The Eco Centre also offers an immersive experience about the history of oases and what they mean for the future. An oasis is an ecosystem, able to survive in a hostile desert environment. With global warming and climatic extremes threatening our planet today, we have much to learn from oases and its message could help save our entire planet.

Oasiscape

Oasiscape is the complete visit route that helps us to understand the meaning and secret lessons of the oasis. In this tour of Al Ain Oasis, you will see that an oasis is not just a Palm grove, but also a whole desert environment. It incorporates architecture, shared knowledge, social behavior and traditional practices that are fundamental to its life. When the Abu Dhabi Tourism & Culture Authority decided to open up the oasis to visitors, instead of taking the city into the oasis – with its urban and modern life – it opted to do exactly the opposite! This low environmental impact project enables you to learn, observe and interact while respecting the cultural integrity of this UNESCO World Heritage Site.
